

Solution Products for PayTV & Internet Service Providers

CONTENTS

- 1** About NEXTLab
- 2** Trusted by Customers
- 3** Solutions for PayTV Service Providers
- 4** Solutions for Internet Service Providers
- 5** Each Solutions Introduction
- A** Product Introduction

1. No.1 brand in Korea delivering solution products of

- (1) IPTV Service Assurance
- (2) Broadband Service Quality Measurement Device

2. An Engineering Powerhouse, fully covers AI & Vision tech. to Hardware production

STB Multimeter

“The All-in-One PayTV Service Tester”

netMeter

“Handheld Device for Broadband, PayTV Installation & Maintenance”

1 Designed to Minimize Labour-related Risks

- Automating the repeated tasks for saving unnecessary labour costs
- Supporting the novice engineers to handle the issues

2 Price Competitiveness

- Maintaining price competence through AI and Hardware convergence
- Can save 50% or more than the market's other major brands

3 Specialized for ISPs and PayTV Service Providers

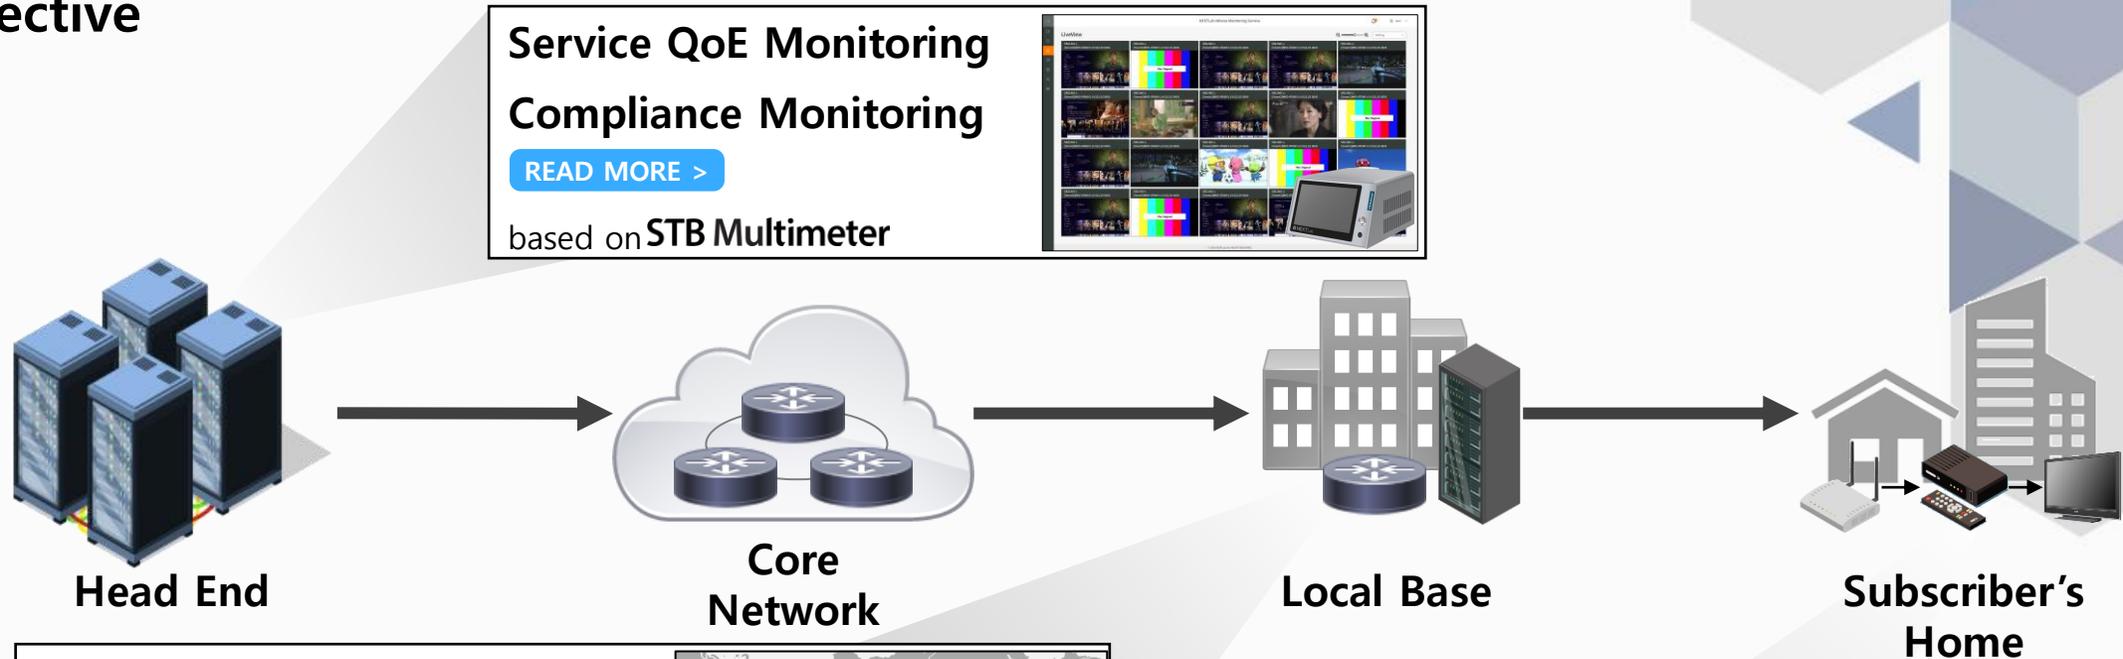

- A decade history of deliveries to ISPs and PayTV service providers

Customers are Saving Costs with NEXTLab's solution products

Product	Representative Delivered Solution
<p>STB Multimeter</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p><small>Not for Public - internal use only</small> </p>	<p>Automation Solution for IPTV Software Quality Evaluation Center (SK Broadband, 2017~)</p> <p>(1) Aging Test Automation (2) QoE Measurement Automation (3) Reproducibility Test Automation</p> <ol style="list-style-type: none"> 1 Saved Labour Costs STB Multimeters reduced required QA testers 2 Faster QA Lead-Time STB Multimeters keep testing 24/7 3 Increased Bug Fixing Rate Can pinpoint the right dev. team to solve <div style="display: flex; justify-content: space-between; align-items: center;"> <div style="text-align: center;">  <p>Web-based Test Assigning & Results Querying</p> </div> <div style="text-align: center;">  <p>Share with Dev. Teams</p> </div> </div> <div style="border: 1px dashed orange; padding: 5px; display: flex; justify-content: space-around; align-items: center; margin-top: 10px;"> <div style="text-align: center;">  <p>Voice UI</p> </div> <div style="text-align: center;">  <p>Set-Top Box</p> </div> <div style="text-align: center;">  <p>Remote Control Unit</p> </div> </div>
<p>netMeter</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p><small>Not for Public - internal use only</small> </p>	<p>Broadband SLA Measurement Device for Field-Engineers (LGU+, 2020~)</p> <p>(1) Internet Speed Measurement (2) IPTV Streaming Quality Measurement (3) STB's VOD Streaming Quality Measurement</p> <ol style="list-style-type: none"> 1 Saved Revisiting Costs All onsite works must be confirmed by netMeter → Decreased defective works 2 Saved Extra Expense No need to carry laptops anymore <div style="text-align: right;">  </div> <div style="text-align: center; margin-top: 20px;">  </div>

(1) Service QoE, Compliance Monitoring

Benefits

- 1 **Monetization Features Monitoring** (i.e., Contents Purchasing)
Automated STB user interface control
- 2 **Realistic Service QoE Monitoring**
Measurement based on the Set-Top Box (STB) output

Features

QoE Monitoring	<p>Audiovisual Quality (AI and non-reference based)</p> <ul style="list-style-type: none"> (1) Macro Block Detection (2) Freeze, Black Screen Detection (3) Loudness <p>Service Quality</p> <ul style="list-style-type: none"> (1) Channel Change Time (2) Reset, RCU Reaction Delay
Features Monitoring	<ul style="list-style-type: none"> (1) Scenario-based User Interface Control (2) Automated Result Evaluation
Alert	<ul style="list-style-type: none"> (1) Flexible Rule-based Alert Criteria (2) Real time Alerts via SNMP, Email, Slack and even the customer's dedicated NMS

(2) Acceptance Test Automation

Benefits

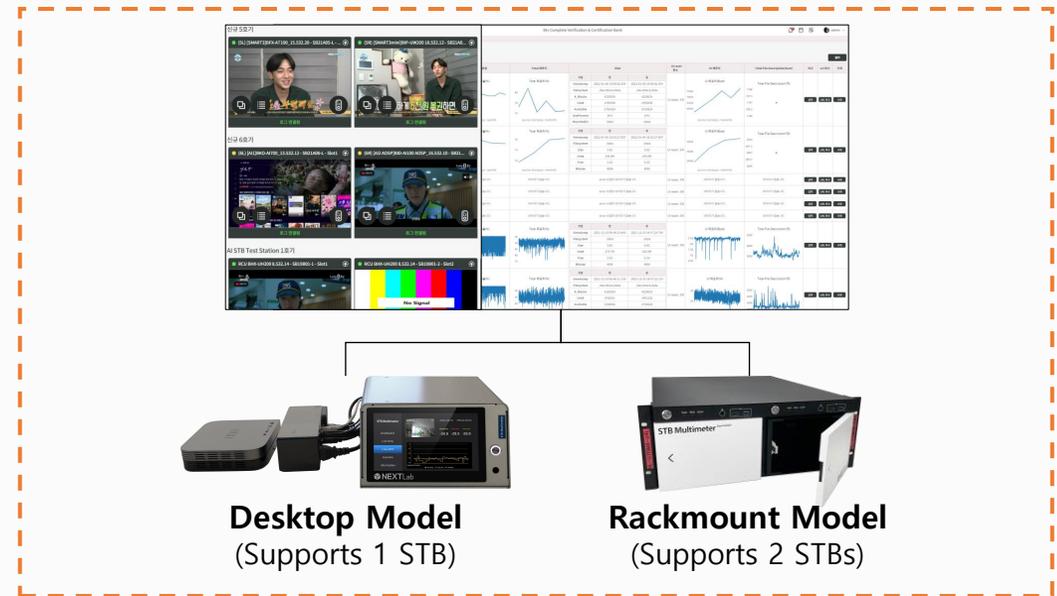

- 1 Boost Inspection Throughput & Accuracy**
via Inspection scenario automation
- 2 Prevent Disputes with STB Manufacturers**
Failed cases can be proven by the inspection data

Features

Inspection Automation	<ul style="list-style-type: none"> (1) Scenario-based Function Test (2) Random-based Aging Test (3) Performance Measurement
Back Data Acquisition	<ul style="list-style-type: none"> (1) Video Recording (2) STB Logs Collection (incl. Top, dumpsys, Logcat, Tombstone) (3) URL-based Back Data Share (Visualized Web Viewer)

Incoming STBs from Manufacturer

Automated Acceptance Test

(3) Software QA Automation

Benefits

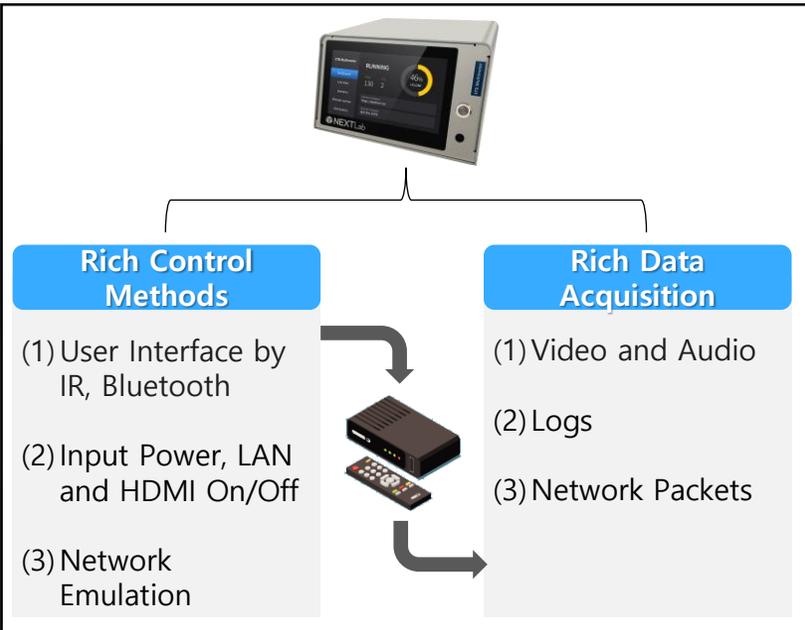

1 Save Labour Cost

By automating the repetitive, complicated and accuracy-sensitive tasks

2 Reduce Bug Fixing Time

- Back-Data Visualization enables pinpointing the exact dev. team to fix the bug
- Dev. teams do not need to do reproducibility test since every back-data has been acquired

Features

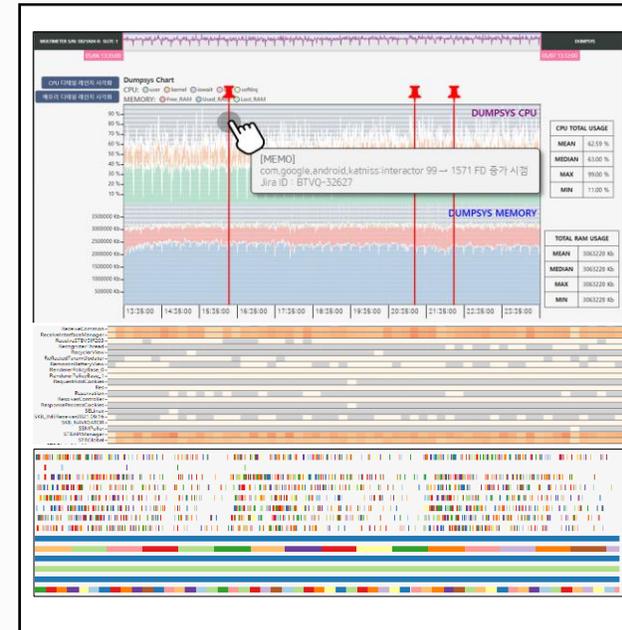

Designed for All-in-One Testing

Scenario-based Test	<ul style="list-style-type: none"> (1) Suitable for Regression Test (2) Script-based Test Automation with OCR, Image Matching and Powerful Python Libraries
Random-based Test	<ul style="list-style-type: none"> (1) Suitable for Long-Time Aging, Stability and Stress Testing (2) Advanced Regression Test : Can verify functionalities at various situations (3) Intelligent Monkey Test : Aim to cover the 'Grey Area' of QA, the first phase version will enable random test in certain specified menus

Test Case based
Grey Area
Random based

Rich Testing Methods

Back-Data Visualization

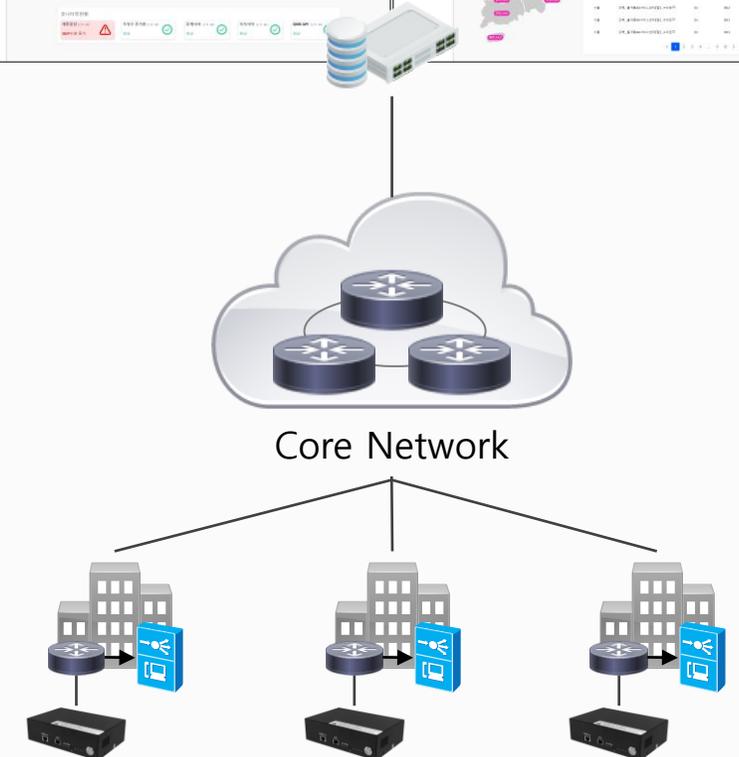

(4) Nationwide Service Monitoring

Benefits

- 1 Variety KPIs Monitoring in One Device**
Not only on TS analysis, other KPIs reflecting subscribers' service experience quality can be monitored in one device
- 2 Local Network Optimization**
Network optimization can be carried out according to regional characteristics

Features

MPEG2-TS Monitoring	<ul style="list-style-type: none"> (1) Up to 30 Channels Concurrent Monitoring (2) RFC 4445 Media Delivery Index (MDI) (3) ETSI TR 101 290 (4) IGMP Leave/Join Delay
OTT QoE Monitoring	<ul style="list-style-type: none"> (1) Playback Delay (2) Buffering Delay & No. of Occurred (3) No. of Resolution Changes & Average Resolution
Internet QoE Monitoring	<ul style="list-style-type: none"> (1) Internet Speed Measurement (2) TWAMP, Ping, Traceroute (3) Web surfing QoE KPIs

Probes are installed at each Local Base

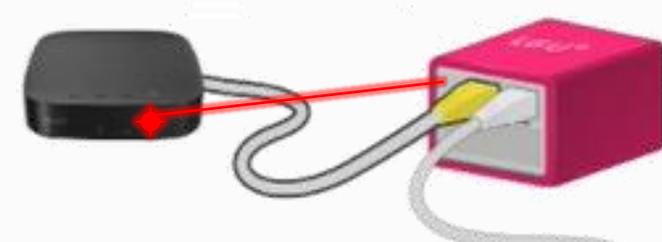

(5) Contents Streaming and STB Testing by Field Engineers

Benefits

- 1 Save Unnecessary STB Replacement Cost**
Field engineers can identify the service failure is an STB issue or a network issue
- 2 Save Revisiting Cost**
Field engineers can do work based on the measurement results

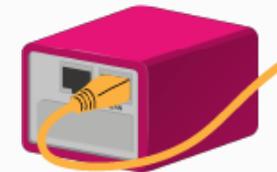

Features

Passive Testing	<ul style="list-style-type: none">(1) Outputs IR Signals(2) Scenario-based Test (i.e., One-Click Major Functions Availability Test)(3) RFC 4445 Media Delivery Index (MDI)(4) ETSI TR 101 290(5) Channel Change Delay, Streaming Bandwidth
Active Testing	<ul style="list-style-type: none">(1) Up to 5 Channels Concurrent Monitoring (MPEG2-TS)(2) RFC 4445 Media Delivery Index (MDI)(3) ETSI TR 101 290(4) IGMP Leave/Join Delay, Each Channels Bandwidth(5) OOB^{Out of Band} Channels Connection Test

Passive Testing – For Verifying STB Failure

(Emulating STB via IR & Monitors flowing packets)

Active Testing – For Verifying Network Failure

(The device directly joins the multicast channels)

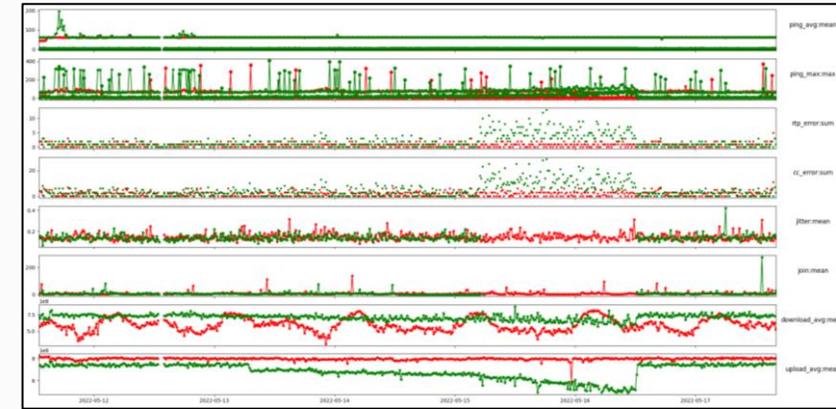

(6) Portable Probe for Root Cause Analysis

Benefits

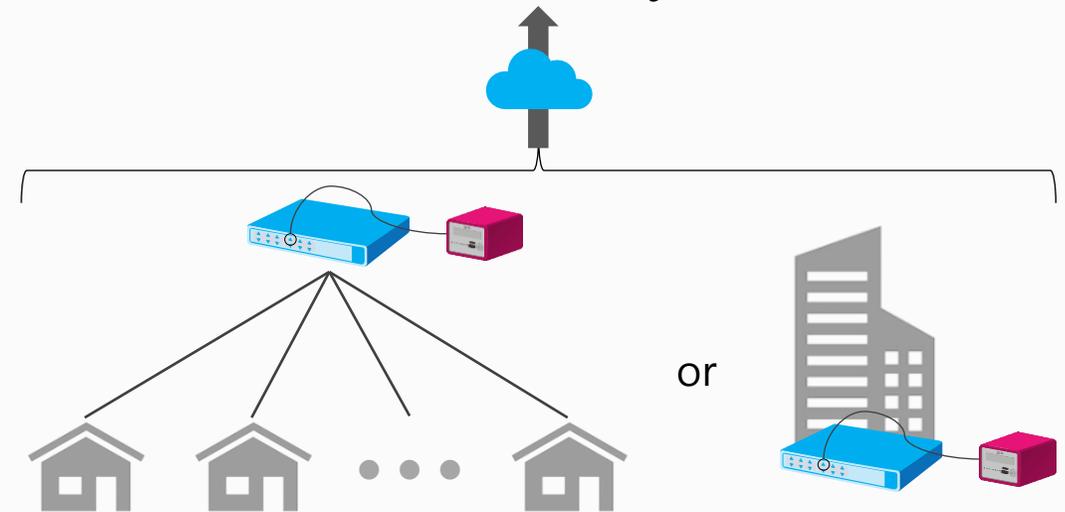

- 1 Get to Know the Reason for Service Degradation**
Rich and dense data can boost your Root Cause Analysis
- 2 Save Cost for Cause Analysis**
No need to wait and see on site until the measurement is complete.
The probe automatically collects data 24/7 and is remotely controlled.

Features

Measurement	<ul style="list-style-type: none"> (1) Scenario-based Measurement at each Probes (2) MPEG2-TS : MDI, ETSI TR 101 290, Bandwidth (3) Internet Speed Measurement : UP/DN, Ping/Loss (4) TWAMP, Ping, Traceroute to Appointed Targets (5) Network Discovery, CDP/LLDP for ONT Info.
Remote Operation	<ul style="list-style-type: none"> (1) Configuring Various Scenarios and Probe Assignment (2) Real Time Measurement Visualization (3) Collects All Probes' Data

Collecting & Visualizing Measurement Data Continuously

Probes are Temporarily Plugged-in to the Service Degraded ONTs

(7) Service SLA Measurement for Field Engineers

← BACK

Benefits

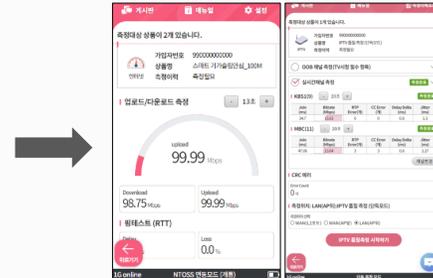

- 1 Save Re-Visiting Cost**
Reduced Defective Work Rate Reduces Re-Visiting Cost
- 2 Prevent Compliance Issue**
Servicing below the SLAs will lead to Compensation to the Subscriber and the Government Penalty

Features

SLA Measurement	(1) Internet Speed Measurement : UP/DN, Ping/Loss (2) MPEG2-TS : MDI, ETSI TR 101 290, Bandwidth (3) STB's VoD Streaming Bandwidth
Network Tools	(1) Ping, Traceroute to Appointed Targets (2) Querying DHCP Information

Cable Plug-in

1-Click Measurement

Verify SLA Satisfaction

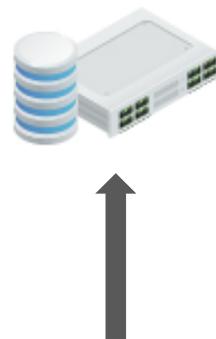

Service Opening/Fixing Complete

(8) Embedded Service Monitoring Agent

Software-based 24/7 Endpoint Monitoring is Possible with NEXTLab's Embedded Software Agents

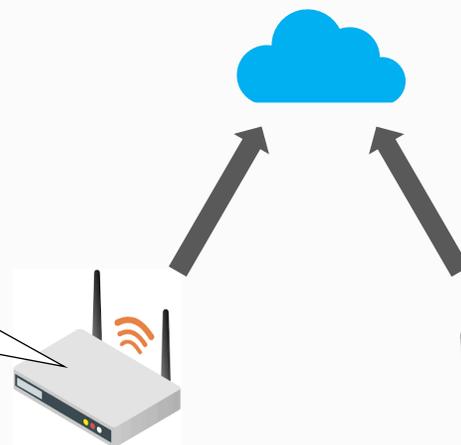

Use Cases

- (1) Service Status Monitoring by Regions or Sites
- (2) Service Failure Cause Analysis
(e.g., Whether the ethernet cable is causing the failure)
- (3) Analyzing Service Impact caused by OTT streaming
- (4) STB S/W Improvement

- (1) Compatible with Linux
- (2) Monitoring Criteria
 - Internet Speed, Ping, TWAMP
 - CRC
 - OTT Streaming Traffic Detection

[Access Point, Router]

- (1) Compatible with Linux, Android STBs
- (2) Monitoring Criteria
 - RTP Error, MDI
 - Internet Speed, Ping, TWAMP
 - CRC
- (3) Collects & Sends STB Logs

[Set-Top Box]

Innovation with NEXTLab

Head Office : 12th floor of H&S Tower, 703 Seolleung-ro, Gangnam-gu, Seoul, Korea
Creative Lab : B102, 10 Seongsuil-ro, Seongdong-gu, Seoul, Korea

“The All-in-One PayTV Service Tester”

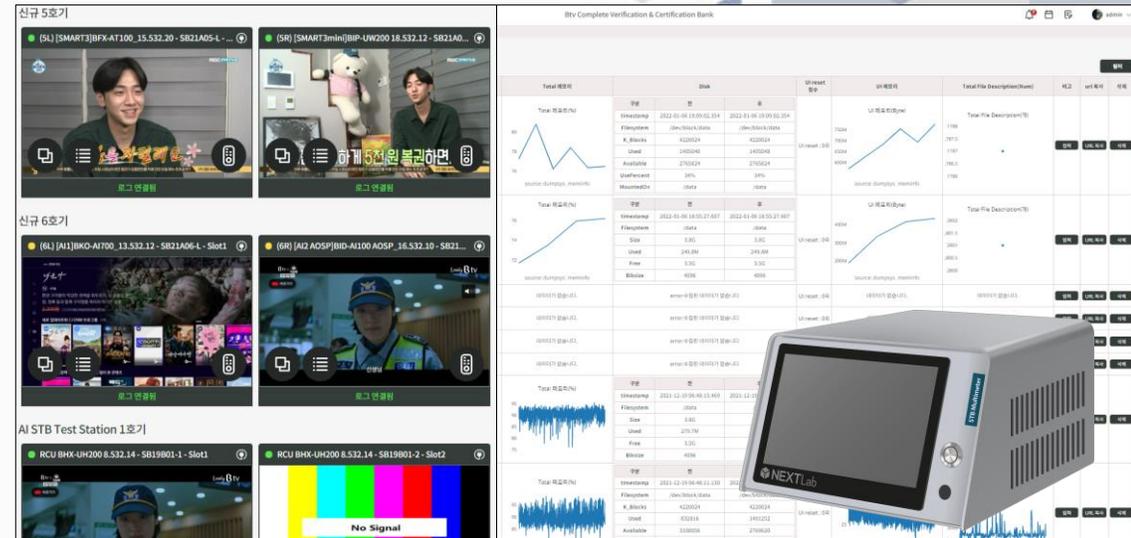

1 Target Customers

PayTV service providers (i.e., IPTV, SatTV, CATV)

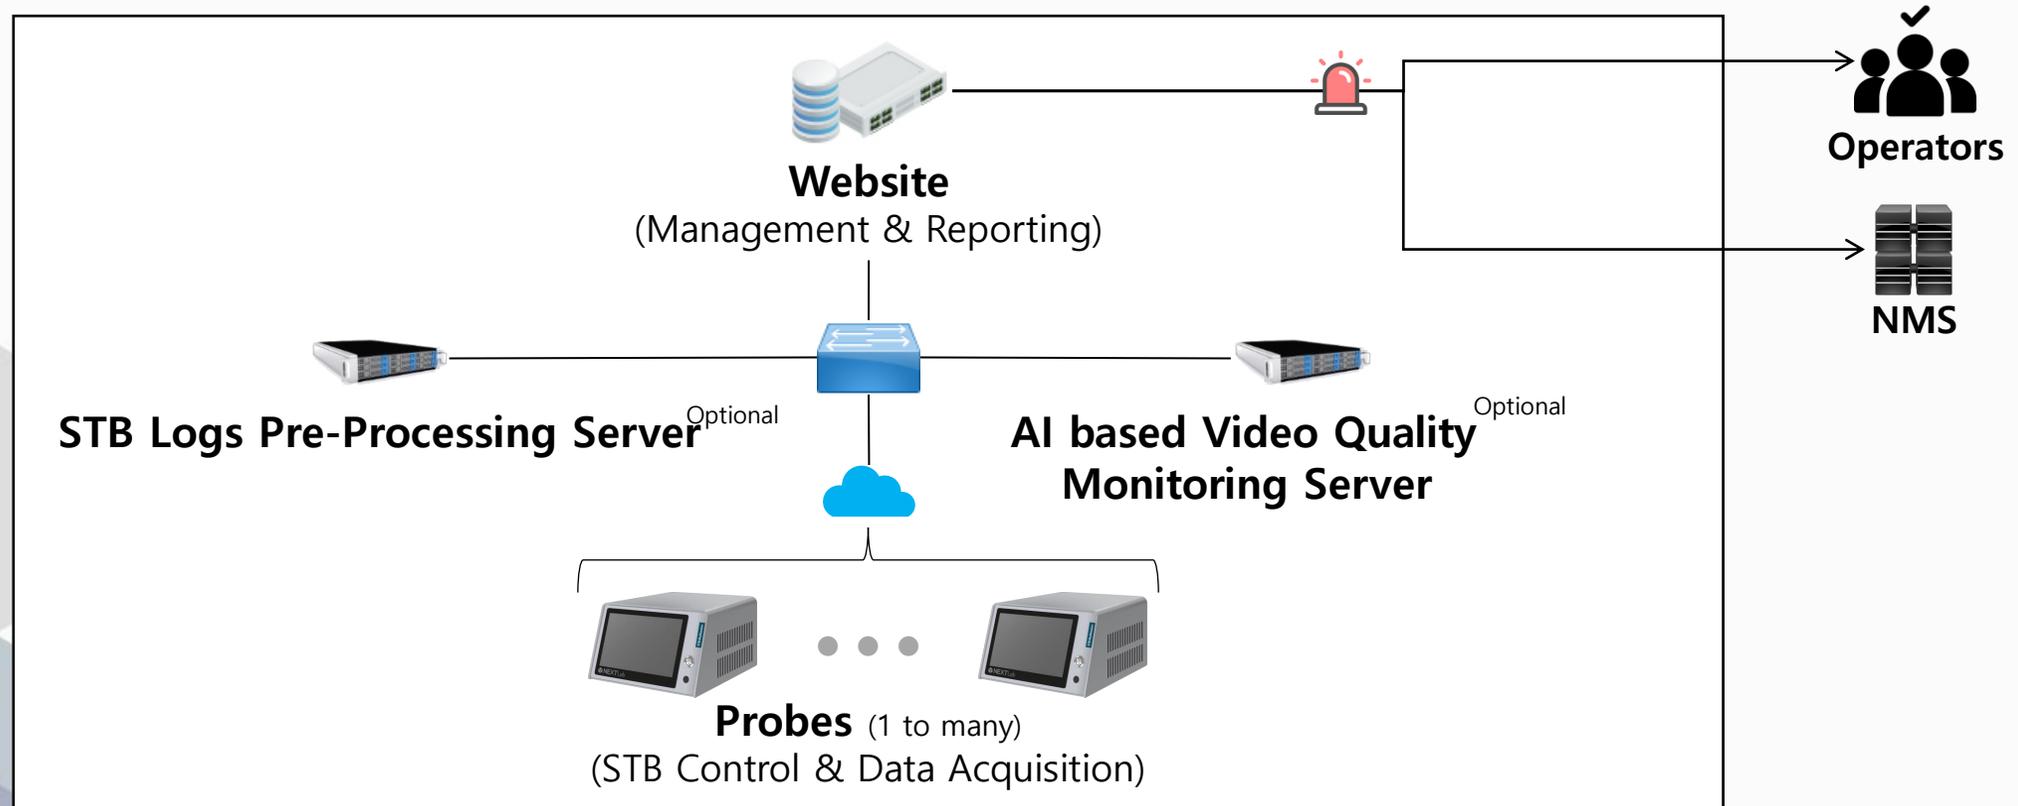

2 Benefits

- Automating the repeatability or precision required tasks
- Provides various STB control functions
- Supports Root Cause Analysis
 - ✓ Collects STB's output video and logs altogether
 - ✓ Simultaneous network packet analysis

3 Key Features

Test Automation	Video-based Service QoE Measure	Audio-Video Monitoring
<ul style="list-style-type: none"> • Scenario Test • Monkey, Aging Test <div style="display: flex; justify-content: space-between; align-items: center; margin-top: 10px;"> <div style="background-color: #4a7ebb; color: white; padding: 5px; border-radius: 5px;">Scenario Test</div> <div style="background-color: #f0e68c; padding: 5px; border-radius: 5px;">Aging Test</div> <div style="background-color: #ffcc00; padding: 5px; border-radius: 5px;">Monkey Test</div> </div> <p style="margin-top: 5px;">← Stereotype Randomness →</p>	<ul style="list-style-type: none"> • Channel Change Time • Booting Time (Cold, Warm) • UI Reaction Time • UI Object Movement Jerkness 	<ul style="list-style-type: none"> • AI-based Macro Block Detection • Freeze, Black Screen • Loudness • Mute

Variety of Ways to Control STB

UI Control

- IR, Bluetooth
- Shell/Adb Command

I/O Control

- LAN/WAN Physical Connection
- Supply Power

Network Control

- Bandwidth, Delay Modulation
- Specific Port/IP Blocking

Rich Back-Data Acquisition

Video & Audio

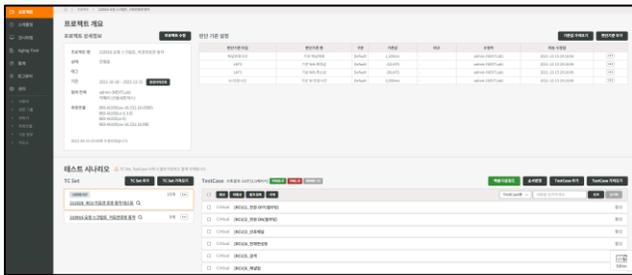

- Via HDMI Capturing
- Up to 60FPS @ 1080p

STB Log

- Via Shell/Adb
- Top, dumpsys, Logcat, Tombstone

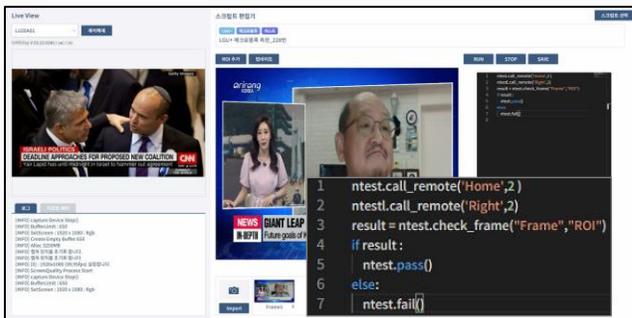

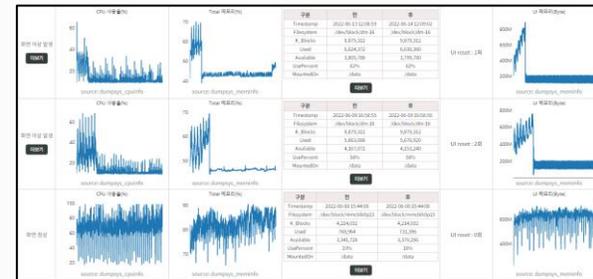

Network Packet

- Via PCAP

“Handheld Device for Broadband, PayTV Installation & Maintenance”

1 Target Customers

Internet service providers (ISPs / CSPs)

2 Key Features

- Helps ISPs to save cost
- Help field engineers to clear onsite issues
- Probes are adaptable to various solutions

3 Benefits

Proven by LGU+

- (1) Save Re-visiting Cost (2) Save Unnecessary Replacing Cost

- (3) Great Integrability

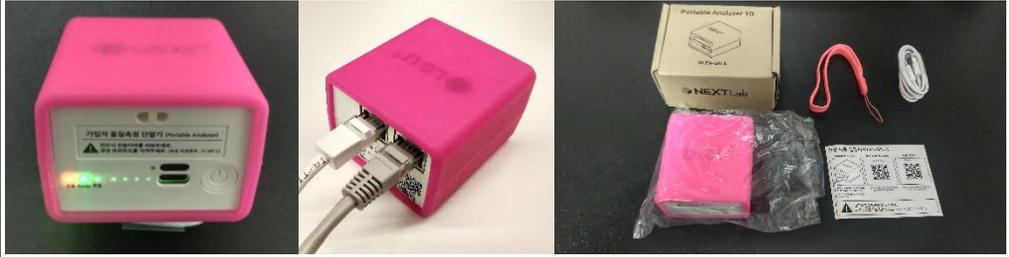

USD 1.2M / year

50% ↓ of revisiting due to defective work

netMeter provides “Data-Driven Decision Making” for replacing

netMeter solution is open to integrate with Customer’s Business Lifecycle
